NO COMPROMISE.

OE Competence for Asian vehicles.

NISSHINBO

THE WORLD IN MOTION

OE COMPETENCE FOR ASIAN VEHICLES

Asian vehicles set the global standard for quality and reliability. With Nisshinbo, you can enjoy the braking to match. Nisshinbo brake friction is engineered in Japan, to the highest OE specification demanded by Asian vehicle manufacturers.

Every Nisshinbo brake pad is the result of a rigorous development and testing cycle. Featuring advanced material formulations and unique product design, Nisshinbo delivers the ideal combination of braking performance, comfort and reliability.

It's an investment in quality and innovation that makes Nisshinbo the largest supplier of OE friction to Asian vehicles – and the number one choice when you want a like-for-like replacement.

There is nothing LIKE THE ORIGINAL.

Fake brake parts are a very real thing. Their poor performance can be extremely dangerous. With disc cracking being one of the biggest dangers as it can lead to complete brake failure.

The PROriginal seal on Nisshinbo brake pad packaging makes it easy to identify if you have purchased an original product or a counterfeit. Just type in the alphanumeric code or scan the QR code

NISSHINBO BRAKE DISCS AND BRAKE SHOES

The Nisshinbo brake discs are precisely tailored to our brake pads to achieve the perfect braking result. A large range of coated discs makes installation quicker and easier: no oil needs to be cleaned off before installation.

- o Made from high-grade steel for optimum performance
- o Large range of coated discs for enhanced comfort and aesthetics
- o Environmentally friendly water based coating
- o Manufactured in strict accordance to O.E. tolerances
- o Meeting ECE R90 requirements

Nisshinbo Part Numbering System

For example, NP 1001

1. NP for Nisshinbo Pads – ND for Nisshinbo Discs
2. The last 3 digits are simply counters without additional meaning
 - o ND1001 Nisshinbo Disc for Toyota Camry
 - o NP1001 Nisshinbo Pad for Toyota Camry

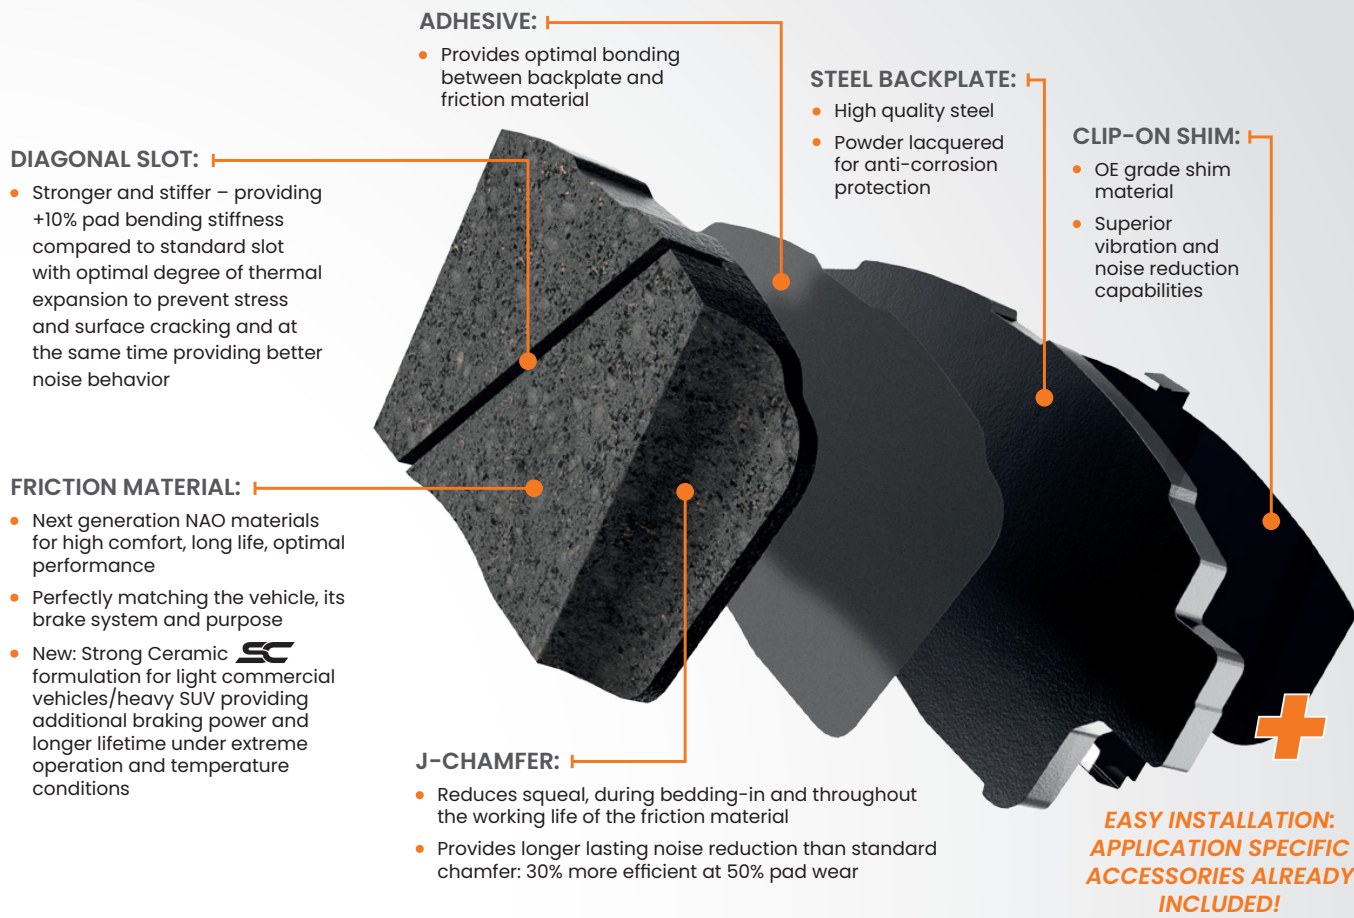

Nisshinbo has a wide range of braking systems which includes more than:

- o 700 refs of Brake pads
- o 480 refs of Brake discs
- o 70 refs of Brake shoe

3. The first digit is determined by the car maker

Daihatsu	1	Proton	3	Kia	6
Lexus	1	Isuzu	3	Ssangyong	6
Toyota	1	Mazda	4	Subaru	7
Perodua	1	Asia Motors	5	Honda	8
Geely	1	Chevrolet	6	Acura	8
Infiniti	2	Daewoo	6	Suzuki	9
Nissan	2	Hyundai	6		
Mitsubishi	3	Genesis	6		

A UNIQUE COMBINATION FOR COMFORT, PERFORMANCE AND LONGEVITY

NEXT GENERATION NAO.

The energy efficiency vehicles of tomorrow are being driven by ever-more complex technology. Developed through advanced materials expertise, Nisshinbo NAO formulations are trusted to deliver the braking performance and environmental qualities demanded by world leading car manufacturers.

- o Low dust for clean wheels
- o Low noise for more braking comfort
- o Environmentally friendly formulation
- o ECE R90 approved
- o Longer disc life through dis-friendly materials
- o Excellent wear characteristics for maximum replacement intervals
- o Exceptional braking effectiveness throughout the friction lifespan

NISSHINBO – OE FRICTION FOR 90% OF JAPANESE CARS

Featuring advanced material formulations and unique product design, Nisshinbo delivers the ideal combination of braking performance, comfort and reliability.

It is the engineering and manufacturing expertise that makes Nisshinbo one of the top 3 OE suppliers to Asian vehicle manufacturers, supplying models like Nissan Murano, Toyota Camry, Jeep Wrangler and many more.

With a brake pad program that offers an unrivaled coverage for Asian models in the aftermarket, Nisshinbo is the number one choice if workshops want a like-for-like replacement.
